

**3: CONNECTED – START CONTROLLING THE ACCESSORIES VIA THE APP**

**Button.**

Press one of the buttons to turn on/off start/stop.

**Circle.**

A small circle in the left corner of a button means the accessory has a timer function. This is lit when active.

**Asset Tracker.**

Here you can see which tools are in the car and if one or more tools have been lost. Add Asset Trackers to track valuable equipment. (Trackers is sold separately.)

**Vehicle Weighing System.**

Here the vehicle's weight is displayed, click the button to see the front/rear weight distribution.

**Heater.**

Shows the current temperature in the car. When the heater is running, the target temperature is also displayed (The next page shows how the heater function is used.)

**Battery Voltage.**

Battery voltage is displayed here. If it is too low, voltage is displayed like this with a red background.

**Driving Journal.**

This shows whether the upcoming routes are set as Business or Private. (The next pages shows how the driving Journal is used.)

**Climate Sensor.**

The vans interior temperature and humidity are shown here. If the limit is exceeded, the values are displayed with a red background..

**Security System.**

This shows whether the security system is on or off.
